

Crimean Engineering and Pedagogical University (Simferopol)

Republic Higher Educational Institution "Crimean Engineering and Pedagogical University" was created in June 1993 to meet the needs of the educational system of the Republic and the people, returned from the deportation. Nowadays it is a large regional scientific and educational complex, carrying out trainings for future specialists on educational levels "Bachelor", "Specialist" and "Master" in 24 different areas: pedagogics, economics, engineering, philology and art education.

Rector of the University - Fevzi Yakubov, doctor of technical sciences, professor, Hero of Ukraine, Honored Worker of Science of Uzbekistan, Honored Worker of Education of Ukraine, winner of the National Prize T.G. Shevchenko.

Responding to the general society's requirements, since the establishment the university is focused *on the three specific tasks forming its mission which he successfully resolves*:

- Crimean Tatars language and culture revival;
- Harmonization of the integration processes in multiethnic society;
- Reforms of trainings for engineering-pedagogical specialists in more liberal way.

The University has about **7000** undergraduate and graduate students (approximately evenly divided into representatives of the Crimean Tatar-Turkic and Slavic cultures), employs over **400** highly qualified scientists and teachers, including more than **200** candidates and doctors of sciences, professors and associate professors. Crimean Industry and Educational system annually receives approximately **1500** graduated specialists. In the cities Kerch, Dzhankoy, Yevpatoria and Feodosia the University has opened its educational and counseling offices. The University holds highly productive scientific activity. The scientists and young specialists of the University's departments annually publish more than 1000 scientific papers, dozens of monographs and textbooks, patents for invention; the University holds and participates in numbers of international and republican scientific conferences. At the University works the Scientific-research Center of the Crimean Tatar language and literature. All the Crimean Tatar language textbooks have been written mostly by the University's professors. Each year more than 800 students participate in conferences at various levels and publish about 300 to 400 scientific papers.

The University participates in international projects, working in the field of cultural and ethical reforms in education, nanotechnology in mechanical engineering, the introduction of new models of the educational process. Network community is a party to counter global threats, which brings together organizations and universities from all continents.

Information Technology Center cooperate with international organizations and university departments of Sweden, Italy, Spain, Portugal, Russia, Egypt, Morocco, CIS, etc.

Crimean Engineering and Pedagogical University (Simferopol) is interested in participating in the Tempus, Erasmus Mundus, Grundvig, ICT, J. Monnet, Leonardo da Vinci etc.
